

# Ultrasonic sensor UMB800-18H40-E4-2M

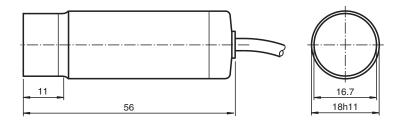

- Front of transducer and housing manufactured entirely from stainless steel
- Degree of protection IP68 / IP69K
- Short version: 55 mm
- Program input
- Temperature compensation
- Mounting bracket MH-18H-01 included in delivery

Single head system

### Function

The enclosure and transducer of this ultrasonic sensor form a hermetically sealed unit. Therefore the sensor is suitable for all applications where a very high tightness is required. Since the sensor housing is made exclusively of V4A stainless steel and all seals are made of highly chemical-resistant materials, this sensor is also predestined for use in chemically aggressive environments. For reliable operation, due to the special design of this sensor, solely the enclosed mounting accessories must be used.

# Dimensions

# **Technical Data**

| General specifications    |                |                 |
|---------------------------|----------------|-----------------|
| Sensing range             |                | 70 800 mm       |
| Adjustment range          |                | 90 800 mm       |
| Dead band                 |                | 0 70 mm         |
| Standard target plate     |                | 100 mm x 100 mm |
| Transducer frequency      |                | approx. 170 kHz |
| Response delay            |                | approx. 100 ms  |
| Electrical specifications |                |                 |
| Operating voltage         | UB             | 10 30 V DC      |
| No-load supply current    | I <sub>0</sub> | ≤ 15 mA         |
| Input                     |                |                 |

# Connection

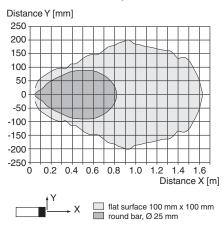

Refer to "General Notes Relating to Pepperl+Fuchs Product Information".

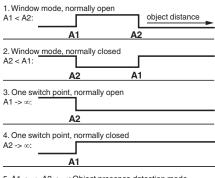

2

### **Characteristic Curve**

#### Characteristic response curve

#### Switching output modes

5. A1 ->  $\infty$ , A2 ->  $\infty$ : Object presence detection mode

Object detected: Switch output closed No object detected: Switch output open

### Accessories

MH-18H-01

Mounting aid, 18 mm

Refer to "General Notes Relating to Pepperl+Fuchs Product Information"

3

# Mounting

### **Mounting instructions**

Comply with the minimum permissible bending radius of 70 mm, if you install the connecting cable!

The mounting accessories included with the sensor must be used in order to ensure reliable operation!

## Commissioning

#### Adjustment possibilities

The sensor is equipped with 1 switching output with 2 programmable switch points. The programming of the switch points and the of output behavior is done via the teach input of the sensor.

#### **Further Documentation**

For information on programming and synchronisation you may refer to the commissioning instruction.
